Plan Vast Radar Warning System for U.S. and Canada

Congress is considering an Air Force proposal for a joint U. S.-Canada radar network to warn against the approach of hostile aircraft. The U. S. share of the cost would be \$161,000,000. While warning that the system will not provide anything like an "airtight" radar fence, the Air Force said it would provide warning of planes up to 300 miles away—sufficient to enable the Air Force to prepare a defense. The map above illustrates one plan for such a radar network as urged recently by F. H. Lack, chairman of the radio industry's mobilization committee, in the magazine Mechanix Illustrated. The radar stations would be in touch with the central control post (inset) by television.

LUBRICARE

Yes sir —there's more than oil and grease to Lubricare! More than just the right lubricants in the right spots, with Buick specialists following factory specifications.

There's a lot of extra care, extra services and inspections, that can be important to you. Just for instance -

We examine your tires for uneven wear, treacherous cuts or bruises. While we're checking the battery we clean

the terminals and grease them against corrosion. We even inspect your muffler and exhaust pipe for leaks, to make sure fumes won't escape into your car.
